

Natasha Davison Aged 8:

What is it?

This is a poster showing that you should put your rubbish in the bin and not throw it on the ground.

Why is it important?

So that you don't make sea animals sick.

How does it affect you?

I get quite upset when I hear about sea animals getting sick from the plastic.

What can you/the adults do to help achieve the goal?

Not throw your rubbish on the floor.

What have you already done to help achieve the goal?

At school, I have cleaned up rubbish to help the sea animals.
