Transforming Serica: The Erskine Deal

rande Ing

Strategic and operational update 16 July 2015

London

ERSKINE

DISCLAIMER

The information presented herein is subject to amendment and has not been independently verified. Serica Energy plc ("Serica") does not represent that the information and opinions contained herein are necessarily adequate or accurate and no liability is accepted for any errors or omissions.

This presentation contains forward-looking statements, corporate plans and strategies which are based upon Serica's internal projections, assumptions, expectations or beliefs concerning such matters as the company's future operational, financial and strategic performance, prospective resources, operational timing, costs and finances. Such forward-looking statements are subject to significant risks and uncertainties which may result in Serica's actual performance, results and accomplishments being materially different to those projected in such statements.

Factors that may cause actual results, performances or achievements to differ from expectations expressed herein include, but are not limited to, regulatory changes, future levels of supply and demand, pricing, weather, wars, acts of terrorism, financial markets, competitor activity and other changes of conditions under which the company is obliged to operate.

Serica undertakes no obligation to revise any such forward-looking statements to reflect any changes in Serica's expectations with regard to such statements or any change in circumstances or events.

This presentation and its appendix are not for publication, release or distribution directly or indirectly, in nor should they be taken or transmitted, directly or indirectly into, the United States, Australia, Canada, Japan or South Africa or any other jurisdictions where to do so would constitute a violation of the relevant laws of such jurisdictions. This presentation may not be reproduced, redistributed or disclosed in any way in whole or in part to any other person without the prior written consent of the Company.

Resource disclosure in this presentation has, except where noted, been prepared by the operators of projects in which Serica Energy plc ("Serica") has an interest and has not been prepared in accordance with National Instrument 51-101 Standards of Disclosure for Oil and Gas Activities ("NI 51-101"). Readers are cautioned that the disclosure herein and in the appendix may not be equivalent to NI-51-101-compliant disclosure.

This presentation is not an offer to sell or a solicitation of an offer to buy or acquire, securities of Serica in any jurisdiction or an inducement or an invitation to enter into investment activity. No part of the presentation, nor the fact of its distribution, should form the basis of, or be relied upon in connection with, any contract or commitment or investment decision whatsoever.

SERICA: COVERING THE FULL CYCLE

- Production: Erskine Field
 - 3.3mmboe booked at 30 June 2015
 - Can deliver up to *4,300boed net to Serica
 - Average rate since production restart >2000boepd net
- Development: Columbus
 - Plans are progressing to develop 5.2mmboe contingent resource
- Exploration: Well Carries
 - 22/19c fully carried well could deliver between 15 and 40mmboe to Serica
 - East Irish Sea Doyle well carry up to £11million gross well costs
- Frontier Exploration
 - Licences in Ireland, Morocco, Namibia and UK with no significant commitments

*maximum daily production seen since re-start in May '15

SERICA: NEAR TERM OBJECTIVES

- Erskine
 - Benefit from expected improvements on Lomond following major investment
 - Improve performance by identifying and solving downstream bottlenecks
 - Deliver solutions to cut costs and extend field life
- Columbus
 - Use experience as Erskine partner to select optimum offtake route
 - Drive down capital costs and aggressively negotiate commercial terms
 - Push forward to Field Development Plan
- Growth
 - Seek further acquisitions where we can add value through technical understanding and influence
 - Extract full value from UK tax losses
 - Create strategic partnerships

SERICA ASSET BASE: PRODUCTION, DEVELOPMENT, EXPLORATION

The focus of today's presentation is on the Central North Sea

ERSKINE: TRANSACTION

- Consideration: US\$11.1million cash plus 13.5 million Serica shares effective 1 January 2014
- Cash consideration payable in four equal instalments: June 2015, 2016, 2017 and 2018
- Final payment adjusted for:
 - Field revenues and expenditures from 1 January 2014 to 4 June 2015
 - Accrued costs
 - 55,000 barrel oil over-lift (sold at over \$100/bbl)
- Serica received US\$9.0million upon completion

ERSKINE: TRANSFORMATIONAL

Material benefits to Serica:

- 3.6 million barrels of oil equivalent acquired at 1 January 2014 at \$4 per boe
- Ongoing cash flow on a tax efficient basis
- BP retain Serica's share of decommissioning liability up to £174million (gross), £31million (net) adjusted for inflation
- Upside in facilities and reservoir performance (already exceeding potential since acquisition)
- Provides platform for further business growth

ERSKINE: OFFTAKE ROUTE & INFRASTRUCTURE

Erskine Platform

- Unmanned wellhead platform with 5 production wells
- Access to wells for wireline intervention
- Multiphase pipeline from Erskine to Lomond
- Lomond Processing
 - Condensate and Gas are separated through the Erskine Production Module (EPM) located on Lomond
 - Gas and condensate are pumped from Lomond to shore

• CATS

- Gas joins the CATS pipeline via riser tower at Everest
- Gas is sold at CATS terminal to SSE (contract) and BP (spot)
- Associated LPG and condensate are sold at CATS Terminal
- Forties Pipeline System (FPS)
 - Condensate is transported via FPS to Cruden Bay
 - Production is sold to BP

ERSKINE: SUB SURFACE

RESERVOIR MODEL

- Five wells drain the four reservoir regions
- Field has produced for 16 years
- Produced Reserves: ~120mmboe (gross)*
- Remaining Reserves acquired (gross):
 20mmboe**
- Remaining reserves at 30 June 2015 (net):
 3.3mmboe**

ERSKINE: WELL POTENTIAL

WELL PERFORMANCE

- 3 of 5 wells producing in May/June '15
- 4 out of 5 wells now on production and have exceeded estimated potential (achieved >4,000 boe/d net on three days in July '15)
- Well intervention work will return 5th well (W2) to production (expected Q3 2015)

Net boepd – Serica share

Graph above shows operator's view on flowing potential of each well – subject to well and facility availability

ERSKINE: BOEPD HISTORY – NET TO SERICA

ERSKINE: FIELD PERFORMANCE SINCE RESTART

Daily Production boe/d

IMPROVED FACILITY PERFORMANCE

- Erskine restarted end May 2015
- 2014/15 investment has improved facility up-time significantly (83% uptime since re-start)
- *Serica share of Erskine production has exceeded 3,000boe/d on 10 days
- *Production has exceeded well performance expectations and has flowed at higher rates than any day in 2014

Serica Net Erskine Production boe/d – since restart

*Caution: continuing strong production is subject to infrastructure uptime and further production history is required before any predictions of future performance can be made

CENTRAL NORTH SEA DEVELOPMENT: COLUMBUS FIELD

- Located in the UK Central North Sea, 8km from Lomond platform
- Serica holds 50% of block 23/16f and operates the field

COLUMBUS FIELD: FULLY APPRAISED

- 5.2mmboe contingent resources net to Serica
- Field has been delineated with four exploration/appraisal wells
- Individual development wells estimated to flow at up to 40mmscfd gas and 1,500bbls/d condensate

COLUMBUS AND ERSKINE SYNERGIES

COLUMBUS PRODUCTION THROUGH LOMOND

- Extends Lomond platform life and availability for Erskine, defers abandonment
- Reduces cost per boe for Erskine and Lomond
- Encourages innovation and new ways of thinking
- Commercial and technical discussions are making progress

COLUMBUS DEVELOPMENT OPTIONS

LOMOND PREFERRED OPTION

- Produce Columbus with a single well initially with scope for a second well, depending on production data
- Production combines with Erskine production at base of Lomond platform (SSIV)
- Alternative designs for Lomond tie-back are under consideration
- Other host platforms are available

COLUMBUS DEVELOPMENT OPTIONS

COLUMBUS ROADMAP

FULLY CARRIED HIGH IMPACT EXPLORATION: 22/19c

BLOCK 22/19c

Located in proven play area

- Analogous discoveries in the area
- Close to Columbus field and infrastructure in which Serica has an interest

Prospects

- Three high impact prospects on block
- Rowallan, Sundrum and Dundonald
- All High Pressure High Temperature (HPHT)
- Gas condensate reservoirs
- Two target reservoirs Triassic and Jurassic
- Clearly defined structural prospects
- Rowallan potential likely first target

Serica Position

- 15% Working Interest
- All operating costs up to and including first exploration well carried by JX Nippon – no cap
- ENI farmed in and operate

22/19c PROSPECTS

MAIN PROSPECT

Rowallan

- Two reservoir targets Triassic and Middle Jurassic
- Structural prospect on 3D seismic
- Analogue to Culzean discovery in Block 22/25a
- Forward Plan
 - Planning underway for a well in 2017
- Potential Value
 - Prospective resource estimate Rowallan P₅₀
 100mmboe gross (15mmboe net to Serica) *
 - Upside P₁₀ 270mmboe gross (40mmboe net to Serica) *

FINANCIAL HIGHLIGHTS: WELL BALANCED

- End year cash balances \$9.9 million, increasing to over \$14 million upon Erskine completion in June with no borrowings
- UK tax losses of \$186 million available for offset against taxable income from Erskine, Columbus and any additional North Sea field acquisitions
- Looking forward:
 - Core operating overheads reduced by more than half since year-end
 - No significant exploration expenditure commitments and no debt
 - Well-placed to add North Sea field production on tax-efficient basis
 - Future exploration drilling only where costs can be offset through third-party carries

ENTERPRISE VALUE: PEER COMPARISON

SERICA HAS THE LOWEST EV/boepd IN PEER GROUP

CONCLUSIONS

THE ERSKINE TRANSACTION TRANSFORMS SERICA'S ABILITY TO GROW

- Serica now has a significant production stream
- With zero debt, a strong tax position and limited commitments
- Holds a strategic position in Erskine/Columbus/Lomond area
- Serica's market cap is \$20million with considerable opportunity to add value to the business by:
 - Improving Erskine performance
 - Exploiting synergies between Erskine and Columbus
 - Utilising the full value of our tax pool through further acquisitions
 - Demonstrating the value of our exploration assets through drilling where carried
 - Continuing to seek farm-in partners for our frontier acreage
 - Exploring the potential of using our assets in partnership with others

These are the opportunities to realise value for shareholders going forward

ADDITIONAL SLIDES

GROUP INCOME STATEMENT DECEMBER 2014

Group Income Statement

for the year ended 31 December 2014	2014 US\$000	2013 US\$000
Continuing operations Pre-licence costs Impairment and write-offs Administrative expenses Foreign exchange (loss)/gain Share-based payments Depreciation	(512) (30,269) (4,296) (235) (337)	(330) (299) (4,458) 341 (252) (109)
Operating loss before net finance revenue and tax	(35,649)	(5,107)

- Excludes Erskine acquisition (completed Jun '15)
- E&E assets are principally Columbus
- No borrowings
- Cash increased to
 \$14million after Erskine completion

EXPLORATION PORTFOLIO: NW EUROPE

UK

- Southern North Sea Greater York Area
 - Ranking prospects to identify drilling target. Close to infrastructure (York)
- East Irish Sea Doyle Prospect,
 - Carry on well (up to £11million gross cap).
 - Well deferred awaiting partnership decision
- Central North Sea Spaniards
 - Relinquishment likely

IRELAND

- Rockall Basin Serica 100%
 - Muckish, Midleton and Derryveagh prospects
 - Large structural and stratigraphic prospects in proven area
 - Awaits improvement in farm-out market
- Slyne Basin Serica 50%
 - Low risk, shallow water Boyne oil farm-out prospect following up on Serica oil discovery at Bandon

EXPLORATION PORTFOLIO: AFRICA

MOROCCO

- Tarfaya-Ifni Basin, Sidi Moussa
 - SM-1 well encountered oil. Evaluating drilling and fluid analysis results
 - Further work under review including possible drilling
 - Requesting licence extension
- Tarfaya-Ifni Basin, Foum Draa
 - Relinquishment planned following well result

NAMIBIA

- Luderitz Basin Serica 85%
 - Prospect B 622mmbbls P₅₀ prospective resources *
 - Other prospects on block, clastics and carbonates
 - High quality database 4,180 sq kms 3D seismic data
 - Extension granted to progress farm-out process
 - Awaits improvement in farm-out market
